- Export shipments in  
Current Marketing Year
- Daily Sales reported  
April 21 - 29, 1975

--As Reported by Exporters

Readers of this release are cautioned that it reports sales commitments outstanding as of the date indicated, all of which are subject to modification, deferral or cancellation by mutual agreement of the parties. It is unlikely that all reported quantities will be exported. Our experience with this monitoring system suggests that sales are apt to exceed exports, sometimes by substantial amounts, during periods when supplies are in balance with expected demand. Actual shipments to date may provide a more reliable measure of current export activity. A meaningful export projection is not obtainable by the simple device of adding outstanding sales commitments to exports to date.

EXPORT SALES REPORT

Comments on release of May 1, 1975 (based on reports from exporters during the week ending April 20, unless otherwise noted):

Wheat: The apparent export commitment (cumulative exports plus outstanding sales) for 1974/75 increased by 548,200 metric tons (MT). A lower commitment (39,300 MT) to the European Community (EC) for the seventh consecutive week was the only major reduction, and was more than offset by a higher commitment to India, which jumped by 355,600 MT to 4.8 million MT. Other increases in commitments were reported to Colombia (82,000 MT), Bangladesh (74,900 MT), and Peru (44,000 MT).

For 1975/76 shipment, the commitment to Brazil rose by 90,000 MT, while the commitment to India jumped by 325,100 MT, bringing the total wheat committed to India for next season to 1.6 million MT.

Feedgrains: The apparent export commitment for 1974/75 declined by 257,600 MT. Total corn commitments were lower by 178,600 MT because lower commitments to the EC (227,700 MT) more than offset increased commitments to Taiwan (73,000 MT) and the Philippines (49,800 MT). Sorghum commitments declined by 54,000 MT, primarily because of a reduction of 56,000 MT in the commitment to Japan.

Sales reported under the daily reporting system for the period April 21-29 indicate a grain sorghum sale of 125,000 MT to Venezuela.

Rice: The apparent export commitment for 1974/75 increased by 2,200 MT, with only a few minor changes in commitments for individual destinations.

Soybeans: On April 24, USDA revised its export estimate for the current marketing year from 12.7 million MT to 11.6 million MT. The further downward revision reflects reduced meal demand, strong U.S. farmer holdings, competition from high quality Brazilian supplies, and the general economic slowdown which includes lower crushing margins. The apparent export commitment fell by 203,000 MT, the twelfth consecutive weekly decline.

Soybean Meal: USDA's export estimate was revised slightly downward from 4.5 million MT to 4.4 million MT as meal demand and domestic crush continue to lag behind earlier expectations. The apparent export commitment dropped by 253,000 MT. However, under the daily reporting system, 533,000 MT were reported sold for delivery to unknown destinations during 1975/76.

Soybean and Cottonseed Oil: Exports of soybean oil were only 300 MT while cottonseed oil exports totaled 13,100 MT, the latter primarily to Egypt. U.S. and European soybean oil prices have declined sharply in recent weeks as speculation over increased Brazilian supplies dampened market prices. However, recent reports indicate that the sunflower crop in Argentina may be lower than the 800,000 MT reported earlier.

Cotton: Exports during the week totaled only 76,000 running bales (RB). Over half of this went to the People's Republic of China and Japan. New sales and cancellations for 1974/75 delivery remained near the previous week's levels, raising total commitments by an additional 54,000 RB. New sales were largest to Hong Kong and Japan. Interest was more evenly divided among the range of staple lengths than in past weeks. Since February 23, total 1974/75 commitments have increased by 329,000 RB. Less interest was shown during the week in 1975/76 delivery with outstanding sales increasing 22,000 bales on the strength of small rises to most of the important Far East non-Communist markets.

Negotiations on contract problems with Korean buyers were successfully concluded with the Government of the Republic of Korea agreeing to provide financing and the CCC increasing Korea's commercial line of credit for cotton. Realization of these arrangements and sales for 1974/75 delivery during the last 2 months could push exports above the present USDA estimate.
